REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The Applicant claims an electrode for a lithium secondary battery wherein an alloy thin film containing tin and indium is formed on the surface of a current collector having a surface roughness of not less than 0.1 μm .

In the prior art of record, Kawakami et al., U.S. Pat. No. 6,432,585 B1, teach an electrode for a lithium secondary battery wherein an alloy thin film containing tin and indium is formed on the surface of a current collector. It also teaches a surface roughness of the electrode material.

However, the prior art of record does not suggest the electrode as described above wherein the current collector has a surface roughness of not less than 0.1 μm .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela J. Martin whose telephone number is 703-305-0586. The examiner can normally be reached on Monday-Friday from 8:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan can be reached on 703-308-0756. The fax phone numbers for
